

## IPnet IPTV application user manual

IPnet IPTV application is designed for watching TV shows on TV-tuners and TV sets with the SMART TV function.

The application enables you to perform the following:

- to manage watching TV channels provided by IPnet company;
- to create and customize your own lists of TV channels;
- to use the function of viewing TV shows in record (the service is to be activated separately on the subscriber's personal page at my.ipnet.ua);
- to create reminders;
- to activate the parental control function;
- to select broadcast language (if provided by the TV channel);
- to send feedback to the provider using remote controller while watching a channel.

### Using the application

- To view the list of available channels, press OK button
- To switch between the menu sections, use navigation keys marked with the ▲▼◀▶ icons and located in the remote controller centre around the OK button
- Selecting the desired menu section is done using the same control keys; selection is confirmed by pressing OK button
- Classification by thematic categories makes it easy to select a channel for viewing
- To exit the channel menu, press the *Exit* button

## Selecting broadcast language

Some channels are offered with 2 or more soundtracks in different languages. Press the **F3** key to open the list of soundtracks available. Select the desired soundtrack using the ▲▼ buttons and confirm your selection by pressing OK.

## Aspect ratio change

A number of channels support change of aspect ratio for a more realistic reproduction of a movie or a television broadcast. The scale change is carried out only in full-screen mode using the **F2** button

## Channel broadcasting troubles

Press the **F1** key to call up the menu enabling you to report detected troubles while viewing a particular channel. In the pop-up window select one of the suggested options. Following that, your report will be automatically sent to our experts.

## Convenient prime-time

The *Convenient Prime-Time* service is to be activated separately on the subscriber's personal page at [my.ipnet.ua](http://my.ipnet.ua). The service enables you to view the TV-channels in record.

The TV shows in the TV guide that can be watched in record are marked by a yellow reel of film icon. To start a recorded TV show, select the desired channel from the list of TV channels, move the cursor to the TV show window, then select the desired date and move the cursor to the desired TV show in the list that opens and then press OK.

When watching a TV show in record, you can pause, fast forward or rewind it using corresponding keys on the remote controller. Return to real-time viewing TV channels is done by pressing the Stop button.

Besides watching TV shows in record on such channels, you can also pause real-time broadcast. To resume broadcasting from the point of pausing, press the *Play* button.

The option of viewing recorded TV shows is granted to users ordering the *Convenient Prime-Time* service on their personal pages and to users subscribing to tariff plans that include this service.

## Reminder

In order not to miss the desired TV show, you can set a reminder about its time of beginning. To do this, select the desired TV show using control keys, press the appropriate **F2** key and an alarm clock icon will appear opposite the selected TV show. To remove the reminder icon, press the **F1** key.

## Menu

Pressing the *Menu* button on the remote controller calls up an appropriate section where you can find the following applications:

- Balance
- Parental control
- Settings
- Weather
- Currency, etc.

## Balance

The application allows you to view the current state of balance, tariff plan, contract number and the date until which the service provision has been paid.

## Parental control

The function enables you to ban selected channels from the complete list of those available. There are two options of banning the selected channels: the *Password* function and the *Hide* function.

To ban TV channels using a password, select the *Password* mode and then enter the desired password and the channels that are to be blocked. To view the banned channel, you must enter the password set. To hide selected channels, go to the *Hide* mode and select the required TV channels.

The settings are saved by pressing the **F2** key.

## Settings

The application settings comprise the following functions: menu language change, list of reminders, creating own category (Profile) of channels.

### Menu language

Go to the *Language* menu section, select the desired language using the  $\blacktriangleleft$  $\blacktriangleright$  keys and save settings by pressing the **F2** key. To apply the settings, press **F3**

### Profile

To create your own categories of channels, select section *Profiles* in the menu. Use this function to create a special set of channels for each member of the family or for particular mood with corresponding names, such as *For Dad, For Mom, Movies*. To do this, press **F4** and use virtual keyboard to enter the desired channel name. The keyboard is called up by pressing the keys *KB*, *a.*, or the one with a keyboard image. After entering the category name exit the keyboard and proceed to selecting channels. Upon selecting, save the change by pressing the **F2** key. To apply the settings, press **F3**
